less amounts owing to Us (if any).

Your policy ends when We pay You the surrender value.

j. Non-guaranteed Benefits

This plan aims to provide 2 types of bonuses which are not guaranteed and may vary according to the future performance of the Participating Fund:

- Reversionary Bonus

This is an annual bonus which We may declare and add to Your policy starting from the end of third policy year. This bonus is usually calculated as a percentage of the sum insured. Once the bonus is declared and allocated, it will form part of the guaranteed benefits of Your policy. All guaranteed benefits will be provided for regardless of the performance of the Participating Fund.

Based on an illustrated investment rate of return of 4.25% per annum, the illustrated reversionary bonus rate is S$5 per S$1,000 sum insured and the illustrative compounding rate on the reversionary bonuses is 0.5% per annum throughout the policy term.

Based on an illustrated investment rate of return of 3.00% per annum, the illustrated reversionary bonus rate is S$2.8 per S$1,000 sum insured and the illustrative compounding rate on the reversionary bonuses is 0.28% per annum throughout the policy term.

You may withdraw the accumulated reversionary bonuses for its cash value. This is an amount that is less than the accumulated reversionary bonuses that have been declared and allocated.

- Terminal Bonus

Terminal bonus is a one-off bonus which may be payable upon the death, TPD or TI of the life insured, maturity date of the policy, or the surrender of the policy, whichever is the earliest. The illustrated terminal bonus rates (as a percentage of the accumulated reversionary bonuses) are as follows:

Number of completed years in force	Terminal Bonus upon claims or maturity	Terminal Bonus upon surrender
1 – 4	0-40%	0-10%
5 – 9	75%	0-10%
10 – 14	150%	2-35%
15 – 19	225%	4-76%
20 – 24	300%	9-188%
25 – 29	375%	21-375%
30 – 34	550%	46-550%
35 – 39	550%	57-550%
40 – 44	600%	77-600%
45 – 49	600%	94-600%
50 and above	700%	135-700%

The illustrated terminal bonus rates above are based on the Participating Fund achieving an illustrated investment rate of return of 4.25% per annum, which is the higher rate illustrated in the policy illustration.

Based on the Participating Fund achieving an illustrated investment rate of return of 3.00% per annum, which is the lower illustrated in the policy illustration, the illustrated terminal bonus rates (as a percentage of the accumulated reversionary bonuses) are as follows:

Number of completed years in force	Terminal Bonus upon claims or maturity	Terminal Bonus upon surrender
1 – 4	0-24%	0-6%
5 – 9	45%	0-6%
10 – 14	90%	1-20%
15 – 19	135%	2-46%
20 – 24	180%	5-96%
25 – 29	225%	13-225%
30 – 34	330%	28-330%

40 – 44	360%	44-360%
45 – 49	360%	54-360%
50 and above	420%	76-420%

The future reversionary bonus and terminal bonus which have yet to be declared are not guaranteed and the actual amounts payable may vary depending on the performance of the Participating Fund. We will decide the level of bonuses to be declared each year as approved by Our board of directors, taking into account the written recommendation by Our appointed actuary.

Please refer to the Policy Illustration for the illustrated non-guaranteed bonuses.

Investment of Assets:

Premiums from all participating policies are pooled together in the Participating Fund and invested in a range of assets. The Participating Fund aims to achieve the illustrated investment rate of return while controlling risks by actively managing a mix of asset classes.

The investment mix for the Participating Fund broadly comprises equities, fixed income instruments, alternatives, cash and equivalents. The strategic and actual asset allocation as at 31 December 2023 are as follows:

Investment Mix	Strategic Asset Allocation	Actual Asset Allocation
Equities	15%	23%
Fixed Income	80%	68%
Alternatives	5%	0%
Cash and Equivalents	0%	9%

In accordance with Our Investment Policy, the Participating Fund can be managed by Us and/or managed by the following external fund manager appointed by Us:
- Schroder Investment Management (Singapore) Ltd.
  Business Address: 138 Market Street, #23-01, CapitaGreen, Singapore 048946

Investment Rate of Return

For Our Participating Fund, the past investment rates of return (after deducting investment expenses only) are shown in the table below:

	2021	2022	2023	Averaged over the last 3 years	Averaged over the last 5 years	Averaged over the last 10 years
Investment Returns	5.64%	-8.85%	3.60%	-0.08%	4.99%	N.A.

Please note that past performance may not be indicative of future performance.

Type of Risks Affecting the Level of Bonuses:

The level of the bonuses depends on the current performance, the future outlook and the financial soundness of the Participating Fund.

The key risks affecting the performance of the Participating Fund include:
- Investment risks;
- Risk that the expenses incurred in managing the Participating Fund being higher than expected;
- Mortality and morbidity risks, which affect the amount of death, disability and illness claims paid out on policies in the Participating Fund; and
- Persistency experience, which is the number of lapsed or surrendered policies in the Participating Fund.

Sharing of Risks:

All policies written within the Participating Fund will share in the overall experience and performance of the Participating Fund, which enables risks to be pooled and diversified. The key risks that the Participating Fund are subject to include investment risks, expense risks, mortality and morbidity risks as well as lapse and surrender risks.

In determining the level of bonuses that We can pay, the assets available to back the plan will be derived by accumulating premiums paid at the actual investment rate of return less the cost of insurance, expenses incurred, commissions paid, taxes and other costs that may be incurred in managing the Participating Fund.

Smoothing of Bonuses:

As the performance as well as the future outlook for the Participating Fund may vary from year to year, bonuses may be smoothed to ensure stable medium- to long-term return. As a result, bonuses may be retained in good years to support the bonuses in years when experience is less favourable. The effect of smoothing is intended to be neutral across generations of policy owners over the long-term.

Our bonus allocation policy is to keep the reversionary and terminal bonus at a level that We expect that they can be supported over the medium- to long-term. Thus, while We review the reversionary and terminal bonus rates yearly, We do not expect them to rise and fall much from year to year. Nevertheless, there may be significant adjustments under exceptional circumstances.

Bonus rates declared for the past years are as below.

Year	Reversionary Bonus Rate as percentage of Sum Insured	Reversionary Bonus Rate as percentage of Accumulated Reversionary Bonus
2023	0.5%	N.A.

The terminal bonus rates for the past years are consistent with the illustrated terminal bonus rates based on the higher rate illustrated in the section on Terminal Bonus. Please note that past performance is not necessarily indicative of the future performance.

Fees and Charges:

The participating policies share in the experience of the Participating Fund. This means that all expenses and charges relating to the operation and management of the Participating Fund, as well as all distribution-related expenses, can be charged to the policy according to the risk-sharing rules described earlier.

Examples of these expenses include:
- Commissions for non-direct purchase insurance products and distribution costs;
- Investment fees paid to the external fund managers;
- Management expenses such as policy issuance, underwriting and claims related expenses; and
- Overhead expenses.

We have included the expenses incurred by the Participating Fund in calculating the premiums You pay. As such, the expenses will not be separately charged to You.

Total Expense Ratio:

The Total Expense Ratio ("**TER**") is the proportion of total expenses incurred by the Participating Fund to the assets of the Participating Fund. These expenses include costs such as investment, management, distribution, taxation and other expenses.

An expected level of expenses to be incurred by the Participating Fund has been allowed for in the premiums payable for Your policy and is not an additional cost to You. If the actual level of expenses vary significantly from the expected level of expenses, it may affect the non-guaranteed benefits You may receive.

For our Participating Fund, the past TERs are shown in the table below.

	2021	2022	2023	Averaged over the last 3 years	Averaged over the last 5 years	Averaged over the last 10 years
Total Expense Ratio	6.93%	3.86%	3.38%	4.29%	N.A.	N.A.

Our Participating Fund was set up in March 2017. Typically, the TER for the initial three years of a new Participating Fund is not reflective of its expected long-term TER. This is because significant expenses are incurred in the initial set-up of a Participating Fund and its asset bases are still being built up. TER, which is expressed as a percentage of assets in the Participating Fund, is expected to reduce over time to a level closer to that of the industry average when the assets in the Participating Fund grow in the coming years.

Please note that past expense ratios may not be indicative of future expense ratios.

Impact of Early Surrender:

As buying a life insurance policy is a long-term commitment, an early termination of the policy usually involves high costs and the Surrender Value, if any, that is payable to You may be zero or less than the total premiums paid. Please refer to the Policy Illustration to understand the loss or low returns on surrendering the policy early.

Update on Performance:

You will receive an annual bonus update by June each year, which consists of the following:
- Participating Fund update that will provide information on the performance of the Participating Fund and its future outlook; and
- Participating policy statement setting out the bonuses allocated to Your policy.

When there is a change in the bonus rate, We will send You an update of the revised illustrated policy values. You may also ask Us for an updated policy illustration anytime.

Conflict of Interests:

We seek to treat all customers fairly at all times, balancing any conflicting interests that may arise between various groups of policy owners or between policy owners and shareholders.

Related Party Transactions:

There is no related party involved in the management of the Participating Fund.
